Engineering and Technology

Co- sponsored by the IEEE Systems, Man & Cybernetics Society Technical Committee on Computational Intelligence, the Association for the Advancement of AI, the Nottingham Trent University, IOS Press and IET.

The 7th International Conference on Intelligent Environments (IE'11) will be held at Nottingham Trent University, United Kingdom. This conference is the seventh edition in a series of highly successful conferences that were organized in Colchester (UK), Athens (Greece), Ulm (Germany), Seattle (USA), Barcelona (Spain) and Kuala Lumpur (Malaysia) in the past six years. The conference provides a collaborative forum for scientists, researchers and engineers from both industry and academia to present theoretical and practical results of Intelligent Environments research and their application in various domains and disciplines. This conference program will include workshops, invited lectures and special sessions of full and posters. Topics of interest include (but are not limited to):

- Ambient Intelligence
- Ubiquitous/Pervasive Computing
- Intelligent Agents
- Context Awareness
- End-User Programming
- Human-Computer Interaction
- Smart Sensors
- Affective Systems
- Wearables (smart clothes, digital fashion)
- Domestic Robotics
- Virtual & Mixed-Reality
- Tele-care and Telemedicine
- Middleware
- Networking
- Communications
- Development/Testing/Evaluation Methodologies
- Architecture and Interaction Design
- Sustainable Design and Smart Buildings
- Ambient Urban Intelligence

Additionally, for this edition there are special tracks of interest on: *Architecture, Ambient Assisted Living, Smart Agriculture, AI, Arts & Design, Educational Technology, HCI, Networks,*

Sustainable Pervasive Systems and Social Sciences, together with tracks on New Horizons and Theoretical Foundations.
